

Soil Biodiversity Overview

Name: _____ Date: _____

Looking for Life

QUESTION: What types of creatures live in the soil at your field site?

What was your hypothesis?

Did the data you collected support your hypothesis? In what way?

Does the data you gathered seem right to you or is it not what you expected?

What variables might affect the data you gather through this test?

What could you do to make this test more accurate?

This worksheet supports the activities in the **Soil Biodiversity** section on
The Field Museum's *Underground Adventure* Web site: www.fieldmuseum.org/undergroundadventure.

Soil Biodiversity Overview

The Big Picture

What is your research question?

How does the data you collected here help you answer that research question?

Look at this data and the data you collected in the **Factors That Affect the Soil** activities. What conclusions can you make from this data? What do these conclusions tell you about your research question?

Look at this data and the data you collected in the **Soil Properties** activities. What conclusions can you make from this data? What do these conclusions tell you about your research question?

Looking at all the data you have collected so far, what is the most interesting or surprising thing you have noticed?

List any additional questions you have after doing these activities that you might want to investigate later.

This worksheet supports the activities in the **Soil Biodiversity** section on
The Field Museum's *Underground Adventure* Web site: www.fieldmuseum.org/undergroundadventure.
