**Speed Zones**

A Speed Zone is a section of street or highway where, on the basis of a geometric and traffic characteristic study or an engineering and traffic investigation, the prima facie speed limit set forth in ORC 4511.21 (B)(1)(a) to (D) is determined to be greater or less than is reasonable or safe and the Director and/or appropriate local authorities have declared a reasonable and safe prima facie speed limit and erected signs in accordance with ORC 4511.21. ORC Section 4511.21 establishes speed limits for all streets and highways within the State. It also provides that the Director may alter speed limits, and that local authorities may request that the Director determine and declare a reasonable and safe speed limit on certain highways under their jurisdiction. Under ORC Section 4511.21 (K), a Board of Township Trustees may, by resolution, declare a prima-facie speed limit on unimproved highways and on highways under their jurisdiction which are within residential and commercial subdivisions. Additional information concerning Speed Zones may be found in OMUTCD Part 5D.

In altering speed limits, the minimum length of a zone not contiguous to an Speed Zone should be greater than 0.4 miles; however, extensions of existing warranted zones may be shorter.

Additional regulations on speed limits can be found in ORC Sections 4511.211 (Speed limit on private residential road or driveway), 4511.22 (Slow speed), 4511.23 (Speed regulations on bridges) and 4511.24 (Emergency vehicles excepted from speed regulations).

IN THE SPECIFIED JURISDICTIONS. THE LETTER "M"
