

October 19, 2001

**To All Holders of the ODOT Standard Sign Design Manual (SDM):**

Transmitted herewith are **two new** standard sign designs, **seventeen revised** designs, **five updated drawings** and **one rescinded** design (see the attached list for details). The related indexes have been updated, including some additional cross-referencing to related federal designs. The new indexes should be placed in the front of each related section of the manual, the new sign designs should be inserted in numerical order in each section, and the revised drawings/designs replace existing ones.

We are in the process of redesigning this manual to be accessible from the Web. You will find that drawings, starting with this revision will be slightly different in style from prior drawings. Each drawing will now include a graphic of each sign type and an outline drawing of the sign showing the dimensions. The manual itself, however, is not yet available on the Web.

Another Feedback Form has been included with this revision package. You are invited to use the enclosed form if you would like to give us your comments and suggestions.

If there are any questions, please contact Lisa McConnell, Standards Technician (phone: 614-728-9361; e-mail: [lisa.mcconnell@dot.state.oh.us](mailto:lisa.mcconnell@dot.state.oh.us)).

Respectfully,

David L. Holstein, P.E.  
Administrator  
Office of Traffic Engineering
