QUEST SOFTWARE PRODUCT GUIDE

Quest Software knows the expectations customers have for IT investments are not always met. That's why we develop innovative products that help our customers get more performance and productivity from their applications, databases and infrastructure. Through a deep expertise in IT operations and a continued focus on what works best, we help customers meet higher expectations for enterprise IT.

APPLICATION MANAGEMENT

Deliver, manage and control complex application environments from end-user to database.

Code Quality and Optimization

Application Assurance Suite for Java and Portals
Application Assurance Suite for Java and Portals is a low-overhead performance diagnostic tool for multi-tiered Java applications and enterprise Portals running in pre-production test environments.

JProbe® Suite
JProbe Suite, a performance toolkit for Java code tuning, helps users quickly diagnose and resolve performance issues in J2EE and J2SE applications down to the line of code level.

JClass®
JClass provides industry-standard Java components for J2EE and J2SE (including charts, data visualization components and reporting), to boost developer productivity and ensure optimal code quality.

QDesigner™
QDesigner is a database and application design tool that combines object-oriented, conceptual and physical data modeling capabilities in a single, integrated environment to accelerate delivery of enterprise applications.
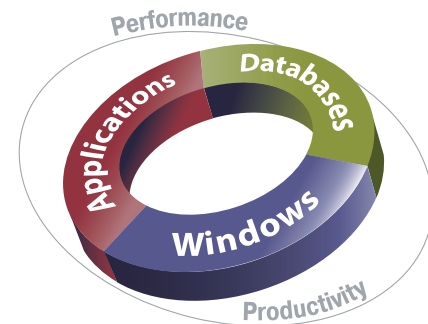

Performance and Availability

Performance Management Suite for Java and Portals
Performance Management Suite for Java and Portals ensures that your critical Java and Portal applications exceed expectations by providing performance and memory monitoring and deep diagnostics for fast resolution.

Foglight®
Foglight is a powerful application management solution console that monitors every tier in critical application technology stacks (including databases, networks, application servers, process schedulers and Web Servers), alerting administrators to problems before they impact end users. Foglight cartridges are available for J2EE, PeopleSoft, Oracle E-Business, Siebel, SAP, IBM WebSphere and BEA WebLogic.

Foglight® Transaction Recorder
Foglight Transaction Recorder simulates end-user business transactions and application response times for proactive service level management for Web-based, Legacy, Client Server and Citrix applications.

Foglight® for SQL Transactions
Foglight for SQL Transactions is a non-intrusive, end-user response time monitor that establishes and maintains service levels for Oracle-based applications.

Foglight® Experience Monitor
Foglight Experience Monitor for Web-based applications optimizes the real end-user experience, improves capacity and quickly diagnoses performance problems.

Spotlight®
Spotlight accurately diagnoses application performance problems in real time and graphically displays all application activity in an intuitive user interface, enabling faster problem resolution without customized scripts or cumbersome utilities. Spotlight is available for Oracle E-Business, Oracle, SQL Server, Unix, IBM WebSphere, BEA WebLogic and Web Servers.

Change and Configuration

Stat® ACM (Application Change Management)
Stat ACM makes organizations more responsive to change and increases visibility into, and control over, the change process. Stat ACM dramatically reduces the time required to deploy patches and critical changes throughout the various instances of an application, resulting in lower total cost of ownership.

DATABASE MANAGEMENT

Improve DBA and developer productivity and increase database performance with market leading database management products.

Code Quality and Optimization

Toad™
Toad is the de-facto standard for database developers and administrators. Toad increases productivity and application code quality while providing an interactive community to support the user experience.

DataFactory®
DataFactory populates development, test and QA databases with millions of rows of meaningful, syntactically correct test data, providing a realistic view of application performance before going live.

Benchmark Factory®
Benchmark Factory is a load testing solution that prevents unplanned downtime and slow performance by testing system limits before going live.

SQL Navigator®
SQL Navigator is a PL/SQL development solution that streamlines workflow by adding a drag-and-drop, graphical user interface to the PL/SQL development environment.

SQL Optimizer™
SQL Optimizer offers complete SQL performance optimization with proactive detection of inefficient SQL, automated SQL rewrite and benchmarking capabilities. SQL Optimizer is available for DB2, SQL Server, Oracle and Sybase.

Performance and Availability

Quest Central®
Quest Central is a suite of tools that enables users to quickly diagnose and resolve the cause of performance problems without manual trial and error or decentralized tools. Quest Central integrates extensive diagnostic capabilities to drill down to the root of the problem and automates tuning to resolve performance issues. It details historical analysis of performance metrics to understand when, why and how performance issues occurred. Quest Central is available for Oracle, SQL Server, DB2 and Sybase.

Foglight®
Foglight is a powerful application management solution console that monitors every tier in critical application technology stacks (including databases, networks, application servers, process schedulers and Web Servers), alerting administrators to problems before they impact end users. Foglight cartridges are available for Oracle, SQL Server, DB2 UDB and Sybase.

Spotlight®
Spotlight accurately diagnoses database performance problems in real time and graphically displays all database activity in an intuitive user interface, enabling faster problem resolution without customized scripts or cumbersome utilities. Spotlight is available for Oracle, SQL Server, DB2 and Sybase.

SharePlex®
SharePlex provides a fault tolerant replica of your Oracle database by ensuring high availability and disaster recovery, eliminating risks associated with migrations, improving performance of OLTP systems and optimizing business intelligence applications.

LiteSpeed™
LiteSpeed dramatically reduces storage costs and backup/recovery windows by compressing data in significantly less time than other backup solutions. LiteSpeed is available for SQL Server.

Change and Configuration

QDesigner®
QDesigner is a database and application design tool that combines object-oriented, conceptual and physical data modeling capabilities in a single, integrated environment to accelerate delivery of enterprise applications.

Schema Manager™
Schema Manager eases the deployment of schema changes from development to test to production by managing dependencies while maintaining control with extensive change documentation.

WINDOWS MANAGEMENT

Simplify, automate and secure your Windows infrastructure with management, migration and integration capabilities.

Active Directory

ActiveRoles Direct
ActiveRoles Direct streamlines and secures administration of Active Directory and Exchange with role-based delegation, rule-based administration, business views and user self-service.

ActiveRoles Server
ActiveRoles Server automates provisioning and ongoing management of users in Active Directory, Exchange and Windows with automated account maintenance and mailbox and share creation.

Vintela Authentication Services
Vintela Authentication Services allows Unix and Linux systems to take advantage of the access, authentication and authorization tool already in place for Windows resources— Active Directory functionally extending AD's capabilities including Group Policy for Unix/Linux.

InTrust® for Active Directory
InTrust for Active Directory allows organizations to audit, report and alert on all domain controller activity, as well as track all detailed changes to Active Directory and Group Policy.

Group Policy Manager
Group Policy Manager offers Group Policy Object (GPO) management capabilities so organizations can efficiently deploy and manage GPOs for better security and control of their IT infrastructure.

Group Policy Extensions for Desktops
Group Policy Extensions for Desktops allows desktop administrators to remotely manage Outlook profiles and reconfigure desktop settings through Group Policy extensions.

Recovery Manager for Active Directory
Recovery Manager for Active Directory empowers users to recover from inadvertent deletions or modifications to Active Directory data in minutes, not hours.

Password Reset Manager
Password Reset Manager allows end users to reset forgotten passwords securely, allowing administrators to implement stronger password policies while reducing the help desk load.

Spotlight® on Active Directory
Spotlight on Active Directory provides real-time diagnosis, troubleshooting and resolution of all problems related to Active Directory replication, performance and availability.

Domain Migration Wizard™
Domain Migration Wizard enables migration to Active Directory, consolidation of Windows NT domains and splitting of Windows NT domains.

NDS Migrator
NDS Migrator migrates users from Novell NDS and Bindery environments to Active Directory and Windows Server 2000/2003.

Migration Manager for Active Directory
Migration Manager for Active Directory simplifies Active Directory-to-Active Directory migration and supports Active Directory redesign.

Vintela Single Sign-on for Java
Vintela Single Sign-on for Java provides a unified platform for identity management of Java and J2EE applications and services from the same Active Directory infrastructure used to provide single sign-on for Windows resources.

Exchange

MessageStats™
MessageStats empowers executive management, Information Technology (IT) managers, and Exchange administrators to perform business-critical analysis and reporting on Exchange.

Archive Manager for Exchange
Archive Manager for Exchange consolidates Exchange storage for improved security and performance with reduced cost.

Availability Manager for Exchange
Availability Manager for Exchange ensures critical send-receive e-mail functionality is always available for Exchange users, even when outages occur.

Recovery Manager for Exchange
Recovery Manager for Exchange rapidly and efficiently discovers and recovers business-critical Exchange data to aid with electronic investigations.

Spotlight® on Exchange
Spotlight on Exchange provides real-time diagnostics, troubleshooting and problem resolution for Exchange.

ActiveGroups
ActiveGroups automates, secures and ensures the accuracy of distribution lists for Exchange and Active Directory.

SelectDL
SelectDL eases distribution list management with delegation and self-service.

Collaboration Services for Exchange
Collaboration Services for Exchange enables secure synchronization of free/busy information and global address lists between Exchange organizations.

Exchange Migration Wizard
Exchange Migration Wizard migrates users from Exchange 5.5 to 2000/2003.

Notes Migrator for Exchange
Notes Migrator for Exchange enables organizations to migrate from Domino/Notes to Exchange with true coexistence and minimal user impact.

GroupWise Migrator for Exchange
GroupWise Migrator for Exchange enables organizations to migrate from GroupWise to Exchange with true coexistence and minimal user impact.

Migration Manager for Exchange
Migration Manager for Exchange migrates users from Exchange 200x to 200x.

Windows

InTrust® for Windows
InTrust for Windows helps organizations comply with external regulations and internal policies by securely collecting, storing, and reporting on heterogeneous event data.

Spotlight® on Windows
Spotlight on Windows graphically displays the real-time flow of data within your Windows operating system, enabling you to quickly diagnose and resolve performance problems.

ERDisk™
ERDisk provides systems administrators with automated backup and 10-minute, remotely managed recovery of Windows workstations and servers.

Patch Management
Patch Management secures enterprise networks by automating the detection and deployment of missing service packs and patches.

Reporter
Reporter enables administrators, security officers and helpdesk staff to collect, store and report on the data they need, whether for configuration change auditing, a security assessment of their Infrastructure Management or for Active Directory pre- and post-migration analysis.

Quest Storage Manager for Windows
Quest Storage Manager for Windows enables storage administrators to perform intelligent assessment and automate crucial ongoing management tasks to ensure an optimized Windows storage network.

Quest Storage Consolidator for Windows
Quest Storage Consolidator for Windows automates the online migration of file server data with security settings intact as a part of a server consolidation project.

Unix/Linux

InTrust® for Unix
InTrust for Unix empowers administrators to securely collect, store, and report on event data from Soloris, Linux, PIX and Checkpoint Firewalls to support compliance with external regulations and internal policies.

Vintela Authentication Services
Vintela Authentication Services allows Unix and Linux systems to take advantage of the access, authentication, and authorization tool already in place for Windows resources—Active Directory, functionally extending AD's security, compliance, and authentication capabilities.

Vintela Management Extensions
Vintela Management Extensions seamlessly integrates Unix, Linux, and Mac management natively within the SMS Administration Console. IT administrators can now use their preferred environment—Systems Management Server 2003—to manage both Windows and non-Windows systems.

About Quest Software, Inc.

Quest Software, Inc. delivers innovative products that help organizations get more performance and productivity from their applications, databases and Windows infrastructure. Through a deep expertise in IT operations and a continued focus on what works best, Quest helps more than 18,000 customers worldwide meet higher expectations for enterprise IT. Quest Software can be found in offices around the globe and at **www.quest.com.**
