Print at Home FAQ's

How do I print my tickets on my computer?

After the initial confirmation e-mail is sent, your tickets will be e-mailed to you as an attached PDF file in another e-mail. Save the attachment onto your computer. You now have your tickets stored. Print them now or later. All you need is [Adobe Reader](#) and a printer (any color or black & white ink-jet or laser printer with a resolution of 300 dpi or more is able to print tickets). At the event, your tickets will be scanned and you'll be admitted.

What are the benefits of printing my tickets on my computer?

- You get your tickets right away. There is no standing in Will Call lines or waiting for mail delivery.
- You can print them at your convenience.

Will this ticket be accepted for the event?

Yes. The ticket that comes out of your printer is a valid, legitimate ticket. Make sure you keep it in a safe place like you would cash and protect it just like you would any other ticket! If any copies are made of the ticket, only the first scan of the barcode will be allowed entry. If more than one copy is scanned, the barcode scanner will alert the attendant that the ticket has already been used.
