This presentation is a companion to Patricia Harpring, *Introduction to Controlled Vocabularies: Terminology for Art, Architecture, and Other Cultural Works;* to be published in 2009

Tower of Babel, Lieven de Cruyl (draftsman, ca. 1640-1720), Coenraet Decker (etcher, 1651-ca. 1685), Athanasius Kircher (author, 1602-1680), in *Athanasii Kircheri e Soc. Jesu Turris Babel, published: Amsterdam, 1679. Getty Research Library* (Los Angeles, California), 85-B16716-pl.[2].
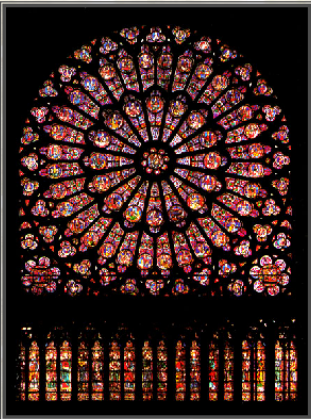

Table of Contents

What Are Vocabularies?

Why vocabularies?

lancets

Medieval
Gothic
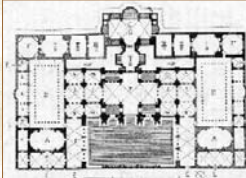

stained glass
pot-metal glass

tracery
bar tracery

rose window
Catherine wheel

- Our goal for many years has been to enhance access to visual arts and material culture information for research, education, and discovery
- Users don't always know what a person, place, or thing is called
- Even knowledgeable users or catalogers may use different terms for same person, place, or thing
- Vocabularies gather related terms together to improve access to art and art history information

Patricia Harpring © 2009 J. Paul Getty Trust

How are vocabularies used?

- Used as sources of standard terminology for use in description, cataloging, and documentation

- Used as "assistants" in online search engines, creating a semantic "road map" that shows links and paths between concepts and terms

- Used as knowledge bases

apodyteria
apodyterium

Vocabulary used in a work record

- *object type:*
  - *Type:* **Panathenaic amphora**
- *personal names:*
  - *Qualifier:* **attributed to**
    - *Identity:* **Painter of the Wedding Procession**
      (Greek vase painter, active ca. 360s BCE)
    - *Role:* **painter**
    - *Identity:* **Nikodemos**
      (Attic potter, active ca. 362 BCE) *Role:* **potter**
- *materials and techniques:*
  - *Material Name:* **terracotta**
  - *Technique Names:* **turning sintering vase painting**
- *geographic names:*
  - *Creation Place/Original Location:* **Athens (Periféreia Protevoúsis, Greece)**
- *corporate names:*
  - *Repository Name/Geographic Location:* **Getty Villa Malibu, J. Paul Getty Museum (Los Angeles, California, United States)**
- *iconographic subjects:*
  - *Extent:* general
    - *Indexing Terms:* religion/mythology object (utilitarian) ceremonial object
  - *Extent:* side A
    - *Indexing Terms:* Athena Promachos human female
  - *Extent:* side B
    - *Indexing Terms:* Nike Victor competition

Panathenaic Prize Amphora and Lid (terracotta), 363/362 BCE; attributed to Painter of the Wedding Procession (as painter), signed by Nikodemos (as potter); J.Paul Getty Museum (Getty Villa, Malibu, California), 93.AE.55

Patricia Harpring © 2009 J. Paul Getty Trust

What is a controlled vocabulary?

- **An organized arrangement of words and phrases that are used to *index* content and/or to *retrieve* content through navigation or a search**
  - It is typically a vocabulary that includes preferred terms and has a limited scope or describes a specific domain

- *Synonyms*
  - **Athens** (*English*) = **Athínaí** (*Greek*) = **Athenae** (*Latin*)
- *Concepts have relationships, provide context*
  - **Athens** *is in* **Greece**
  - **Epiktetos II** *is* **possibly identified** *as the* **Kleophrades Painter**

Patricia Harpring © 2009 J. Paul Getty Trust

What is a controlled vocabulary?

- **There are several types of controlled vocabularies, including the following:**

  - **Subject heading list**
  - **Controlled list**
  - **Synonym ring list**
  - **Taxonomy**
  - **Thesaurus**

  Getty Vocabularies are thesauri

Patricia Harpring © 2009 J. Paul Getty Trust

© J. Paul Getty Trust; Patricia Harpring 2009

Types of vocabularies

- **Subject heading list**: uniform words or phrases assigned to books and articles (or other materials) to describe the subject or topic and to group them with materials having similar subjects

- **usually in alphabetical order**
- precoordination of terminology is a characteristic of subject headings)

  Cat family (Mammals)--Literary collections
  Cat Sacred - Ancient Egypt

Types of vocabularies

- **Subject heading list**: uniform words or phrases assigned to books and articles (or other materials) to describe the subject or topic and to group them with materials having similar subjects

- subject headings typically combine several unique concepts together in a string **as in the Library of Congress Subject Headings** (LCSH)

> Cat family (Mammals)--Literary collections
> Cat Sacred - Ancient Egypt

Types of vocabularies

- **Authority file:** A set of established names or headings and cross-references to the preferred form from variant or alternate forms. The Library of Congress name authority file is a well-known authority file.

- Vocabulary types are not mutually exclusive. E.g., a given vocabulary can be an authority file and a thesaurus.

- Building local authorities is recommended by CDWA and CCO.

Types of vocabularies

- **Controlled list:** A simple list of terms used to control terminology

- In a well-constructed controlled list: ▪each term must be unique; ▪ terms should all be members of same class; ▪ terms should not be overlapping in meaning; ▪ terms should be equal in granularity/specificity; ▪ and terms should be arranged alphabetically or in another logical order

anteaters
armadillos
bats
bears
cats
cows
deer
dogs
elephants
goldfish
horses
ostriches
pandas
pigs
zebras

Jean-Baptiste Perroneau; Portrait of Magdaleine Pinceloup, © J. Paul Getty Museum; Chat Noir, Theophile-Alexandre Steinlen, © Sta. Barbara Museum of Art. Egyptian Cat, © Metropolitan Museum. Cat and Kittens, © National Gallery of Art. Maneki Neko, Japanese, © private collection.

© J. Paul Getty Trust; Patricia Harpring 2009

Types of vocabularies

- **Controlled list:** A simple list of terms used to control terminology

- May include terms from other controlled vocabulary resources

- For some elements or fields in the database, a controlled list may be sufficient to control terminology, particularly where the terminology for that field is limited and unlikely to have synonyms or ancillary information

anteaters
armadillos
bats
bears
cats
cows
deer
dogs
elephants
goldfish
horses
ostriches

Patricia Harpring, 2009 © J. Paul Getty Trust

Types of vocabularies

- **Synonym ring list:** A list comprising sets of terms that are considered equivalent
- **No preferred term**
- **Generally used for search and retrieval, providing access to content that is represented in natural, uncontrolled language**

domestic cat → *Felis domesticus* → *cat*

house cat ← *Felis catus*

Jean-Baptiste Perroneau, Portrait of Magdaleine Pinceloup, © J. Paul Getty Museum; Chat Noir, Theophile-Alexandre Steinlen, © Sta. Barbara Museum of Art. Egyptian Cat, © Metropolitan Museum. Cat and Kittens, © National Gallery of Art. Maneki Neko, Japanese, © private collection.

Synonym ring list: A set of terms that are considered equivalent for retrieval; related but not synonymous

Examples of synonym rings Note that some equivalents are synonyms, others are related but not synonymous

Speech disorders

Speech defects — Defective speech

Disorders of speech — Speech, Disorders of

Synonym Rings
clouds, cumulus, nimbus, storm clouds, cloudy
meteorology, weather, atmospheric science
storm, thunderstorm, snowstorm, hurricane, tornado, twister, waterspout
rain, rainy, precipitation, rainfall, hydrometeor
ultra-violet radiation, UV, ultraviolet radiation
wind, windy, windstorm, wind damage, air flow, jet stream

Patricia Harpring, 2009 © J. Paul Getty Trust   *Image: Synonym ring from NISO Z39.19*

Types of vocabularies

- **Taxonomy**: An orderly *classification* for a defined domain
- Vocabularies that organize a body of knowledge into conceptual categories are classifications and taxonomies

Animal Kingdom
.......Vertebrates (phylum)
............Mammalia (class)
.... Carnivora (order)
.... Felidae (family)
.... Felis (genus)
.... Felis domesticus (species)

Jean-Baptiste Perroneau, Portrait of Magdaleine Pinceloup, © J. Paul Getty Museum; Chat Noir, Theophile-Alexandre Steinlen, © Sta. Barbara Museum of Art. Egyptian Cat, © Metropolitan Museum. Cat and Kittens, © National Gallery of Art. Maneki Neko, Japanese, © private collection.

Types of vocabularies

- **Alphanumeric classification scheme:**
  Controlled codes (letters or numbers, or both letters and numbers) that represent concepts, headings, or textual correlates

- They generally have an implied taxonomy that can be surmised from the codes

- The Dewey Decimal System and ICONCLASS are examples

Vocabulary: ICONCLASS
http://www.iconclass.nl/

- **ICONCLASS is an alphanumeric classification scheme with textual correlates designed for the iconography of art**
- **Primarily religious and mythological themes in Western art**
- **Alphanumeric scheme allows arrangement as a taxonomy**

Revised Nomenclature for Museum Cataloging: A Revised and Expanded Version of Robert G. Chenhall's System for Classifying Man-Made Objects

Currently under revision by Nomenclature Committee

Patricia Harpring, 2009 © J. Paul Getty Trust

How does Chenhall Nomenclature differ from the AAT?

- Users should use both
- For art and architecture, the AAT has much, much better and deeper coverage. Nomenclature is more generalist with shallow coverage of more things, and has headings in addition to terms
- Only overlap between Nomenclature and AAT is in Objects Facet
- Much of Nomenclature is out of scope (e.g., medical and surgical equipment, because AAT focuses on art)
- AAT is thesaurus, Nomenclature not a full-blown thesaurus, but has preferred and use for terms

Patricia Harpring, 2009 © J. Paul Getty Trust

How does Chenhall Nomenclature differ from the AAT?

- Nomenclature includes some compound terms (headings) that AAT users construct for themselves
- AAT has incorporated all of Nomenclature that is within scope for the AAT, relatively high degree of overlap
- Nomenclature has no scope notes/definitions, except for broadest levels, AAT has scope notes
- Nomenclature has no qualifiers, AAT does
- Nomenclature has fewer UF terms than AAT
- Nomenclature has all upper case, all inverted, vs. AAT lower case and natural order terms

Patricia Harpring, 2009 © J. Paul Getty Trust

NISO National Information Standards Organization

Z39.19

Tools related to or utilizing vocabularies

Ontology

- Ontologies are used in the semantic web, artificial intelligence, software engineering, and information architecture as a form of knowledge representation about a particular domain of knowledge.
- Defining relationships is key, they use vocabularies

- **Ontology:** Formal, machine-readable specifications of a conceptual model

- Concepts, properties, relationships, functions, constraints, and axioms are all explicitly defined

- Not a controlled vocabulary, but uses one or more controlled vocabularies for a defined domain and expresses the vocabulary in a representative language that has a grammar for using vocabulary terms to express something meaningful

- Ontologies generally divide their world into the following areas: individuals, classes, attributes, relations, and events

- The grammar of the ontology links these areas together by formal constraints that determine how the vocabulary terms or phrases may be used together

- ▪ **Ontology:** Formal, machine-readable specifications of a conceptual model

- ▪ An ontology is used to make queries and assertions

- ▪ Ontologies have some characteristics in common with faceted taxonomies and thesauri
- ▪ but the ontology will use strict semantic relationships among terms and attributes with the goal of creating knowledge representation, whereas thesauri in the art domain provide tools for cataloging and retrieval

paintings

watercolors   oil paintings

Irises. Vincent van Gogh (Dutch, 1853-1890); 1889; oil on canvas; J. Paul Getty Museum (Los Angeles, California, United States), 90.PA.20

Still Life. Henri Matisse (French, 1869-1954); ca. 1905; oil on cardboard on wood, National Gallery of Art (Washington, DC, United States), 1970.17.40
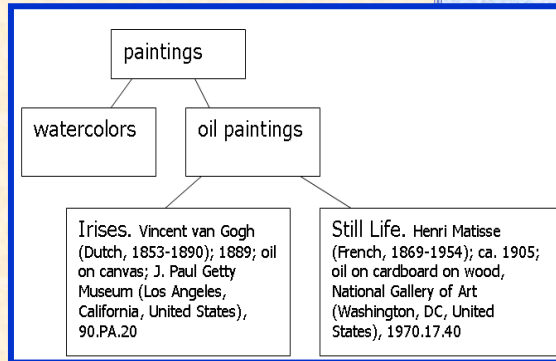

Tools related to or utilizing vocabularies

Folksonomy

- ▪ Neologism referring to an assemblage of concepts, which are represented by terms and names (called *tags*) that are compiled through social tagging.
- ▪ *Social tagging* refers to the decentralized practice and method by which individuals and groups create, manage, and share tags (terms, names, etc.) to annotate and categorize digital resources in an online "social" environment.
Image from weblogs.elearning.ubc.ca/.../FolksonomyCast.jpg

- **Folksonomy:** Assemblage of concepts that are represented by terms and names (called *tags*) that are compiled through social tagging

- Not a controlled vocabulary, but could use vocabularies; used for retrieval
- *Social tagging* = decentralized practice where individuals and groups create, manage, and share tags (terms, names, etc.) to annotate digital resources in an online "social" environment
- Typically without hierarchical structure, typically have no preferred term for a concept, and may not even cluster synonyms
- By definition not applied to indexing by professional indexers, generally characterized by non-standard, idiosyncratic tagging

Brief Overview:

The Art & Architecture Thesaurus (AAT)®
The AAT is a structured vocabulary of more than 133,000 terms, descriptions, bibliographic citations, and other information relating to fine art, architecture, decorative arts, archival materials, and material culturee.

The Union List of Artist Names (ULAN)®
The ULAN is a structured vocabulary containing more than 225,000 names and biographical and bibliographic information about artists and architects, including a wealth of variant names, pseudonyms, and language variants.

The Getty Thesaurus of Geographic Names (TGN)®
The TGN is a structured, world-coverage vocabulary of 1.3 million names, including vernacular and historical names, coordinates, and place types, and descriptive notes, focusing on places important for the study of art and architecture.

The Getty Research Institute

Vocabulary Program

Our Mission

Operating as a unit with the GRI Digital Resource Management department (formerly known as the Getty Standards Program), the Getty Vocabulary Program creates controlled vocabularies that contain terms, names, and other information about people, places, things, and concepts relating to art, architecture, and material culture.

- The Getty vocabularies are by far the most heavily used electronic resource produced by the GRI.

- They are the most frequently accessed resources on the Research subsite of getty.edu, and consistently among the top 5 resources on the entire Getty Web site. Hundreds of licenses for the full data sets have been negotiated with a variety of organizations and vendors.

Heavy use for an art resource, illustrates how valued the Vocabularies are in the user community

© J. Paul Getty Trust; Patricia Harpring 2009

- The Getty vocabularies are used by various audiences
  - by catalogers or indexers who are describing works of art, archival materials, visual surrogates, or bibliographic materials
  - by researchers
  - by systems implementers creating search tools to enhance end-user access to online resources

(Guidelines for indexes)

ISO/TC46/SC9 Web site

ISO 5964 was prepared within ISO Technical Committee (TC) 46 which develops International Standards for information and documentation. The responsibility for ISO 5964 was assigned to TC 46/Subcommittee 9.

ISO 5964 is available for purchase, in separate English and French editions, from the ISO and its national member organizations.

- Getty vocabulary terms and associated information are valued as authoritative because they are derived from published sources and represent current research and usage in the art history community.

- The vocabulary program publishes extensive editorial manuals online. We also make frequent presentations and conduct training workshops at the Getty and at conferences throughout the year.

© J. Paul Getty Trust; Patricia Harpring 2009

- The Getty vocabularies are compiled in large part from contributions from the user community, including various Getty projects and qualified outside institutions.
- Institutions may make contributions in bulk in our prescribed XML format or via an online form.
- Bulk contributions can range from a few thousand to several million records.

- The Getty vocabularies are compiled in large part from contributions from the user community, including various Getty projects and qualified outside institutions.
- Institutions may make contributions in bulk in our prescribed XML format or via an online form.
- Bulk contributions can range from a few thousand to several million records.

- **Thanks to our contribution program, in essence we have many "adjunct Vocabulary Program Editors," with expertise in a variety of areas**

- *Individual contributions are made one at a time, amounting to dozens or hundreds per month; even though the number is relatively small, this method of contributing is critical for the core user institutions that do not have the resources to submit bulk contributions.*

- Contributions to our vocabularies are vetted, managed, edited, augmented, merged with existing data, placed into hierarchies and other relationships, and published by the Getty Vocabulary Program.
- Licensed files are released annually; the data on the Web site is refreshed every month.

- Contributions to our vocabularies are vetted, managed, edited, augmented, merged with existing data, placed into hierarchies and other relationships, and published by the Getty Vocabulary Program.
- Licensed files are released annually; the data on the Web site is refreshed every month.

- The systems in place to allow this work were built and are maintained by a dedicated group from the Getty Information Technology Services (ITS), who worked on user requirements and testing in close cooperation with the Vocabulary Program.
- *Systems to edit data, add data, load data; to publish data; reports for work flow, quality control, and publication; to allow contributions via online and XML.*

- **We work closely with various cataloging projects all over the Getty and with ITS.**

- **Members of our staff are co-editors of the Categories for the Description of Works of Art (CDWA) and Cataloging Cultural Objects (CCO), which are standards and editorial rules for cataloging art and architecture, and CDWA Lite, which is a standard for the exchange of art information.**

GENERAL DISCUSSION

The creator and date of creation are *core*. This category focuses on the action or activity of creation, design, or manufacture. A work of art or architecture may be the product of a number of processes, and the creator responsible for each contribution should be recorded. Information about creation is necessary to identify the work and to distinguish it from other works. Knowing the creators and the date and place of creation provides researchers with crucial understanding of the context and meaning of the work.

Multiple creators and dates
Multiple individuals may be responsible for the creation of a work, and they may have played different roles. Include all pertinent creators. It is important to distinguish the artist or architect primarily responsible for designing or making the work. It is also important to identify those who had secondary roles in making the work, such as master printers, technicians, publishers, or architectural engineers. If two or more artists assumed a joined identity to create a work , their assumed identity should be recorded as creator (e.g., *Beggarstaff Brothers*). If a work is the joint product of a firm, factory, studio, or company, such as *Artimede*, the *corporate body* should be identified as the creator. If there is are multiple dates or a range of dates associated with the creation, indicate this.

Groups of works
For groups, it is important to list all artists who contributed to the creation of the items in the group, and all dates associated with their creation.

Uncertainty
Indicate uncertainty and ambiguity as necessary. Sources may reflect disputes about the attribution or dates for a particular work. When multiple suggestions have been made, the preferred attribution and dates of creation should be the ones accepted by the repository of the work. Other attributions or dates have scholarly interest, however, and should be recorded also.

Unknown creator or unknown date
Values for creator and date must be supplied, even when the information is uncertain. In the CDWA, an *unknown* creator differs from an *anonymous* creator. An anonymous creator refers to the situation where the oeuvre and general time and place of activity of the artist have been established, but his or her name is simply unknown (e.g., *Master of the Aachen Madonna*). An *unknown creator* refers to a situation where the oeuvre or hand of the artist is not established (e.g., *unknown Florentine*). When the creator is *unknown*, include a designation of the culture or geographic place that produced the work rather than a name (e.g., *Florentine* or *unknown*

▪CDWA includes discussion and brief cataloging rules for elements

CDWA Lite:

XML Schema Content for Contributing Records via the OAI Harvesting

What is CDWA Lite?

CDWA Lite is an XML schema to describe core records for works of art and on the *Categories for the Description of Works of Art* (CDWA) and *Cataloging Guide to Describing Cultural Works and Their Images* (CCO).

Purpose of this schema

The purpose of this schema is to describe a format for core records for works of art and material culture, based on the data elements and guidelines contained in the CDWA and CCO. (CCO is based on a subset of the CDWA categories and VRA Core.) CDWA Lite records are intended for contribution to union catalogs and other repositories using the Open Archives Initiative (OAI) harvesting protocol. Elements 1 through 19 in this schema are for descriptive metadata, based on CDWA and CCO. Elements 20 through 22 deal with administrative metadata. All attributes are optional unless otherwise noted.

NOTE: CDWA Lite version 1.1 (17 July 2006) corresponds to CDWALite-xsd-public-v1-1.xsd. The specification version 1.1 replaces version 1.0.

CDWA Lite Specification: A list of Elements, Tags, Description, and Examples: download the PDF.
CDWA Lite Schema: Version 1.1 CDWALite-xsd-public-v1-1.xsd (earlier version 1.0 also available.)

- CDWA Lite is XML schema for exchange of art object information
- Based on CDWA and CCO

➤ **Information about contributions:** send your name, institutional affiliation, scope of proposed vocabulary contributions to vocab@getty.edu, subject = contributions

© J. Paul Getty Trust; Patricia Harpring 2009

http://www.getty.edu/research/conducting_research/vocabularies/

Getty Vocabularies

Target audience:

➢ Three Getty vocabularies are intended to provide terminology and other information for indexing and retrieving data related to objects, artists, concepts, and places important to various disciplines that specialize in art, architecture and material culture

➢ Primary users of the Getty vocabularies include museums, art libraries, archives, visual resource collection catalogers, bibliographic projects concerned with art, researchers in art and art history, and the information specialists who are dealing with the needs of these users. In addition, a significant number of users of the Getty vocabularies are students or members of the general public

© J. Paul Getty Trust; Patricia Harpring 2009

---

http://www.getty.edu/research/conducting_research/vocabularies/

Getty Vocabularies

Language:

➢ **Most fields in AAT, TGN, and ULAN records are written in American English**

➢ **However, vocabularies are structured as multi-lingual thesauri; names/terms may be expressed in many languages**

➢ **All Names are written in the Roman alphabet**

➢ **Where names have been transliterated from other alphabets, the transliteration using the appropriate ISO standard for that language will be flagged as the preferred name for that language whenever possible**

Diacritics:

➢ **Names and other fields contain dozens of different diacritics, expressed as codes (e.g., $00) in the data files**

➢ **Mapped to Unicode, moving to Unicode in data soon**

➢ **implementers should translate codes into the proper diacritical mark for end-users**

© J. Paul Getty Trust; Patricia Harpring 2009

http://www.getty.edu/research/conducting_research/vocabularies/

Getty Vocabularies

Accessing the vocabularies:

➢ **Catalogers and indexers who use the vocabularies typically access them in two ways:**
  - ➢ By using them as implemented in a collection management system (either purchased off-the-shelf through a vendor or custom-built for their local requirements), or
  - ➢ By using the online databases on the Getty Web site

➢ **Databases made available on the Web site are intended to support limited research and cataloging efforts. Companies and institutions interested in regular or extensive use of the Getty vocabularies should explore licensing options by contacting the Getty Vocabulary Program at vocab@getty.edu**

➢ **Implementers who wish to provide vocabularies to end-users or use them in search engines may license the vocabularies in any of three formats: XML, relational tables, or MARC (soon only XML); licensed files include no user interface**

© J. Paul Getty Trust; Patricia Harpring 2009

http://www.getty.edu/research/conducting_research/vocabularies/

Getty Vocabularies

Comprehensiveness and updates:

➢ **Getty Vocabularies are compiled resources; are not comprehensive**

➢ **They grow through contributions from qualified professionals**

➢ **Information in the vocabularies is compiled by the Getty Vocabulary Program in collaboration with many institutions. Institutions interested in contributing may contact us at vocab@getty.edu**

➢ **Selected institutions that catalog works of art, architecture, cultural objects, or their visual surrogates are eligible to contribute**

➢ **Contributors must follow the editorial rules and contribute data in the prescribed XML format or via the online Web form**

➢ **Implementers should allow for updates, given that the vocabularies grow and change over time**

➢ **New versions are released in licensed files annually and on the Web site every month**

Slide 1

Equivalence Relationships

- **Synonyms,** terms referring to the same concept may exist in different forms
- multiple languages, multiple spellings, modern and historical usage

Harlem Renaissance

Negro Renaissance

New Negro Movement

Renaissance de Harlem

Renaissance, Harlem

Patricia Harpring © 2009 J. Paul Getty Trust   Images: see last slide

Slide 2

- Equivalence relationships typically should be made only between terms and names that have genuine *synonymy* or identical meanings

- On the other hand, a vocabulary for retrieval may link terms and names that have *near-synonymy* or similar meanings in order to broaden results

Harlem Renaissance

Negro Renaissance

New Negro Movement

Renaissance de Harlem

Renaissance, Harlem

notes
Gaudí was influenced by Catalonia's
medieval history and architecture. His
works display a respect for
craftsmanship and structural logic. He
was also inspired by forms in nature,
using it in structure and ornament,
creating a highly personal, organic style.
His work is characterized by sculptural
plasticity, the manipulation of light, and
the use of mosaics and polychromy. His
later style is classified as part of
Modernisme, a style related to Art
Nouveau.

SCOPE OF ULAN

New additions to ULAN must be within scope

- Scope is from Antiquity to the present
- Identified individuals or groups of individuals working together (corporate bodies)

- Involved in the conception or production of visual arts and architecture
- May include artists, architects, craftsmen, as well as people and corporate bodies closely related to artists, including rulers, prominent patrons, museums and other repositories of art

Patricia Harpring, 2009 © J. Paul Getty Trust

SCOPE OF ULAN

What is an artist?

- Artist: Person/group involved in the design or production of the **VISUAL ARTS** that are of the type collected by art museums
- Although the objects themselves may actually be held by an ethnographic, anthropological, or other museum, or owned by a private collector
- Performance artists are included (but not persons involved in the performing arts)

- Architect: Person/group involved in the design or creation of structures that are made by human beings, are large enough for human beings to enter
- Structures are of practical use, are relatively stable and permanent, considered to have aesthetic value, were designed by professionals, and constructed with skilled labor

Patricia Harpring, 2009 © J. Paul Getty Trust

SCOPE OF ULAN

Patricia Harpring, 2009 © J. Paul Getty Trust

- In addition to individual artists and architects
- Occasionally ULAN includes records for rulers and other patrons
- Only prominent rulers and patrons (e.g., Emperor Hadrian or Lorenzo de'Medici)
  - must be universally important to other users
  - patrons who had a role in the creative process
  - local donors and sitters go in your local authority, not ULAN

- Corporate Bodies may be included
- Group of people working together as an entity (not necessarily legally incorporated)
- E.g., architectural firms, photographic studios, and other groups of artists working together
- Museums and other repositories of art works (not building names)
- (building names will go in future CONA)

REQUIRED FIELDS FOR ULAN

- **preferred name**
- **variant names: display form of the name**
- **source(s) for the names**
- **display biography**
- **role(s)**
- **nationality(ies)**
- **sex**
- **birth date**
- **death date**
- **hierarchical position for corporate bodies**

Patricia Harpring, 2009 © J. Paul Getty Trust

WHAT IS A NAME IN ULAN?

- *Names, appellations, and designations used to identify the person or corporate body*
  - Full name, historical names, official name, names in various languages
  - May include honorifics or titles
- MUST be equivalents: Refer to the same person or corporate body
  - If an anonymous hand is "probably" the same as a named artist, these are two separate records and linked through Associative Relationships

Patricia Harpring, 2009 © J. Paul Getty Trust

EXAMPLES OF NAMES

Kalf, Willem	▪ inversions
Willem Kalf	▪ natural order
Pei, I. M.	▪ initials
L$00opez, Jos$00e Antonio	▪ diacritics
Burgkmair, Hans, the elder	
Bartolo di Fredi	▪ elder, younger, titles
Gentile da Fabriano	▪ patronymics and place names
Masaccio	
Le Corbusier	▪ nicknames and pseudonyms
Katshushika Hokusai	
Kicking Bear	▪ transliterations and translations
Monogrammist ELA	
Borden Limner	▪ anonymous artists, hand is identified
Adler and Sullivan	
Savonnerie Manufactory	▪ corporate bodies
National Gallery of Art	

PREFERRED NAMES

- In each record, one name must be flagged "preferred"
- "Preferred" name is the name most commonly used in the literature
- Chosen from authoritative scholarly sources and general reference works

- Generally vernacular; but English (when there is an English equivalent, e.g., corporate bodies)
- Transliterated into Roman alphabet where necessary
- Please include VARIANT NAMES as well

EQUIVALENCE RELATIONSHIPS

Kahlo, Frida

Frida Kahlo
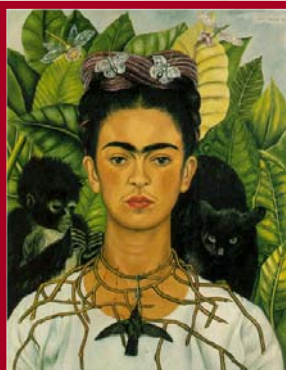

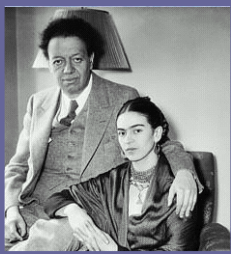

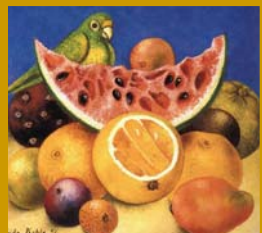

Kahlo de Rivera, Frida

Rivera, Frida

Kahlo y Calderon, Magdalena Carmen Frida

- one name is required – inverted and natural order
- many records have multiple names

Patricia Harpring, 2009 © J. Paul Getty Trust

NAMES IN ULAN

NAMES:

Wren, Christopher *(preferred, index, LC)*

Christopher Wren *(display)*

Wren, Sir Christopher

- All names **_must_** refer to the same person or corporate body
- Record names in mixed case (not all caps)
- Generally only 2 to 4, not more than 15 names (obscure inventory or sales cat. names not mandatory or desirable, but published names and artist's signature are desired)

Names in ULAN

NAMES:

Wren, Christopher *(preferred, index, LC)*

Christopher Wren *(display)*

Wren, Sir Christopher

- Prefer the inverted form of the name most commonly used in standard, authoritative, scholarly publications in American English
- Is typically not the fullest form of the name
- Typically does not include titles, honorifics, *Mrs.*, *Sir*, etc.

© J. Paul Getty Trust; Patricia Harpring 2009

portrait: Godfrey Kneller, 1711; image Bridgeman Art Library. St. Paul's Cathedral, London. Image: Creative Commons

Modern Western names

Patricia Harpring, 2009 © J. Paul Getty Trust

NAMES:

Meier, Richard *(preferred, index, LC)*

Richard Meier *(display)*

Meier, Richard Alan

- inverted order is preferred name
  - where appropriate
- name #2 is the Display Name, natural order
- first, last, and middle names
  - are not parsed in separate fields

DESCRIPTIVE NOTE

DESCRIPTIVE NOTE:

Riza, son of 'Ali Asghar, was a leading artist under the Safavid shah Abbas I (reigned 1588-1629). He is noted primarily for having created portraits and genre scenes. The various names for this artist and the attributions of paintings in his oeuvre are somewhat uncertain, since his signatures and contemporary documentary references to him are ambiguous. Most scholars agree that the artist, Aqa Riza, who is named by Safavid ch[...] same person as Riza in the court of Abbas (thus, "Abassi") [...] artist's style changed significantly at mid-life. Others belie[...] different artists with similar names are responsible for the [...] attributed to Riza. His early paintings display a fine, almos[...] linear style with mainly primary colors; the palette of his la[...] darker and earthier, and the lines are coarser and heavier. [...] born in Kashan and he probably died in Esfahan.

Topics may include:
- disputed issues or ambiguity regarding names or facts
- facts regarding the life of a person or founding and dissolution of a corporate body
- brief explanation of with whom the artist studied
- characteristics of the style of the artist or firm (only if you are an art historian or otherwise experienced in writing about style)
- description of the artist's stylistic development (only if you are an art historian or otherwise experienced in writing about style)

SCOPE OF TGN

New places in TGN must be within scope

- TGN places include political entities and physical features
- Scope is global, some extraterrestrial
- Includes all current continents and nations
- Historical places, including nations and empires
- Prehistory to the present

- Real places, not mythical
- May include formerly inhabited places, historical places with unknown exact locations "lost settlement"
- Focus on places important to art and material culture

Patricia Harpring, 2009 © J. Paul Getty Trust

REQUIRED FIELDS FOR TGN

- **preferred name**
- **variant names, as stated in Rules**
- **source(s) for the names**
- **place type(s) (e.g., *inhabited place*)**
- **hierarchical position**

WHAT IS A NAME IN TGN

- Names, appellations, and designations used to identify a place
  - Current, historical, official, local usage
  - May include a "core" name and descriptive designation (e.g., Mount Etna or Mississippi River)
- MUST be equivalents, referring to the same place
- If archaeological site is near but not on site of the modern town, these are two separate records, not two names in the same record

EXAMPLES OF PLACE NAMES

Firenze
Florence
Fiorenza
Tel Hazor
Tel Hazor
Tel-Hazor
Big Apple
City of Brotherly Love
Michigan, Lake
Florentine

- vernacular names
- variant names in other languages (English)
- historical names
- transliterations
- variations in spelling, diacritics, punctuation, or capitalization
- nicknames
- translations
- inversions (physical features)
- adjectival forms

PREFERRED NAMES

- One name flagged "preferred"
- "Preferred" name is the name most commonly used
- Generally vernacular; but English for continents, oceans, historical entities, etc.

- Chosen from authoritative scholarly sources and general reference works in American English
- Include English variant if there is one, flag it
- May have been transliterated into Roman alphabet by your source where necessary
- Please include **VARIANT NAMES** as well

EQUIVALENCE RELATIONSHIPS

Firenze (*preferred, vernacular, Italian-preferred*)
Florence (*English-preferred*)
Florencia (*Spanish-preferred*)
Florenz (*German-preferred*)
Fiorenza (*historical*) Medieval
Florentia (*historical, Latin*) name of Roman colony on N bank of Arno
Florentine (*adjectival, English*)

- All names *MUST* refer to the same place (e.g., lost sites)
- Record names in mixed case (not all caps)
- Generally only 2 to 4, not more than 15 names (obscure archival names not mandatory or desirable, but published names are desired)
t of Arms of Florence, floor mosaic, Medici Chaple, Florence
e from Ediz. Giusti di S. Becoci, Firenze   *phpto by Patricia Harpring*

Names in TGN

Firenze *(preferred, vernacular, Italian-preferred)*
Florence *(English-preferred)*
Florencia *(Spanish-preferred)*
Florenz *(German-preferred)*
Fiorenza *(historical)* Medieval
Florentia *(historical, Latin)* name of Roman colony on N bank of Arno
Florentine *(adjectival, English)*

- Prefer the vernacular form commonly used in standard authoritative sources in English language
- Include the preferred English form as well when it differs from vernacular
  - *generally only for famous places and large places (nations, mountain ranges)*

Coat of Arms of Florence, floor mosaic, Medici Chaple, Florence
image from Ediz. Giusti di S. Becoci, Firenze   *phpto by Patricia Harpring*

Multiple Vernacular Names

Strasbourg *(preferred, vernacular, French-preferred)*
Strassburg *(vernacular, German-preferred)*
Straßburg *(vernacular, German-preferred)*
Strossburi *(vernacular, Alsatian-preferred)*
Estrasburgo *(other, Spanish-preferred)*
Strateburgum *(historical, Medieval Latin)*
Argentoratum *(historical, Ancient Latin)*

- multiple vernacular languages
- important to record all
- prefer the one used in standard sources that also prefer the vernacular (e.g., atlas, gazetteer, NIMA)
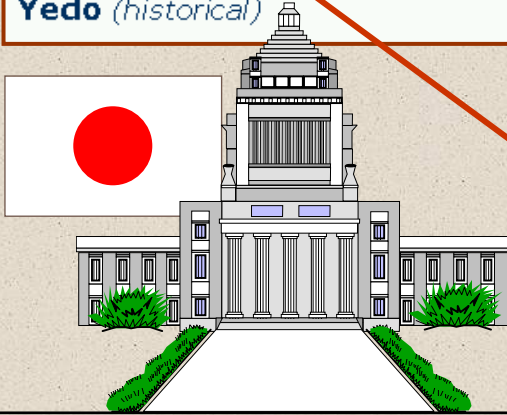

photos by Patricia Harpring

TRANSLITERATIONS, DIACRITICS

Tōkyō *(preferred, vernacular)*
Tokyo *(preferred, English-preferred)*
Tokio *(historical, English)* obsolete spelling
Edo *(historical)* during Tokugawa Shogunate begining 1603
Yeddo *(historical)*
Yedo *(historical)*

- use of diacritics
  - $00 codes (T$01oky$01o)

Processing diacritics

T'ainan (preferred, C ,V,N)
Tai-nan (C ,V,N)
T'ai-nan (C ,V,N)
T'ai-nan-shih (C ,V,N)
Tainanshi (C ,V,N)
Tainanshih (C ,V,N)
Dainan (H ,O,N)
T'ai-wan (H ,V,N)
T'ai-yüan (H ,V,N)
Ta-yüan (H ,V,N)

- Transliterated into the Roman alphabet
- Generally using a transliterated source
- ISO standards provide the preferred transliteration protocol

Processing diacritics

T'ainan (preferred, C ,V,N)
Tai-nan (C ,V,N)
T'ai-nan (C ,V,N)
T'ai-nan-shih (C ,V,N)
Tainanshi (C ,V,N)
Tainanshih (C ,V,N)
Dainan (H ,O,N)
T'ai-wan (H ,V,N)
T'ai-yüan (H ,V,N)
Ta-yüan (H ,V,N)

ISO
International Organization for Standardization
ISO 7098:1991
Information and documentation
-- Romanization of Chinese

- Currently diacritics are stored as codes, which are translated into diacritic characters for displays
  - e.g., $00e = "e" with an acute accent
  - they translated into Unicode 台南市

## DISPLAY NAME, INDEXING NAME

Naples (**Napoli province**, Campania, Italy, Europe)

Napoli (vernacular preferred)
Naples (English-preferred)
Napoli province (display name)

- Flag "display name" = special name flagged for horizontal displays or "headings"
- where simple name is confusing

HIERARCHICAL RELATIONSHIP IN TGN - WHOLE/PART

Top of the TGN hierarchy *(hierarchy root)*
.... World *(facet)*
.... North and Central America *(contin...*
.... Costa Rica *(nation)*
.... Alajuela *(province)*
.... Cartago *(province)*
.... Guanacaste *(province)*
.... Heredia *(province)*
.... Limón *(province)*
.... Puntarenas *(province)*
.... San José *(province)*
- provinces are part of the nation
- displayed with indentation
- indicated by linking each place to its "parent"

© J. Paul Getty Trust; Patricia Harpring 2009

map of Andalucia: © Andalucia, http://www.andalucia.com/

- Choosing the parent
- To add a new record, TGN requires that you name the correct administrative division within the nation where the place should be positioned
- Consult the Rules and precedent for other places in that nation
- If you cannot determine the correct administrative subdivision, use the narrowest level known (e.g., state or nation, if you do not know the county)

Patricia Harpring, 2009 © J. Paul Getty Trust

DESCRIPTIVE NOTE

For Gaul (historical region)

Note: Refers to the region inhabited by the ancient Gauls, comprising modern-day France and parts of Belgium, western Germany, and northern Italy. It was a powerful ancient country. Inhabited from ca. 600 BCE by Celtic Galli. French Gaul (the area of Gaul that is modern France) was later divided by Rome into four provinces: Narbonensis, Aquitania to the west and south of the Loire, Lugdunensis in central France between the Loire and the Seine, and Belgica in the north and east.

Topics may include the following:

- disputed issues, sovereignty, or ambiguity regarding the names or critical facts about the place
- possible confusion of the place due to its name being a homograph for a nearby place
- physical description
- description of its location (do NOT repeat the hierarchy information, but you may mention physical features, etc.)
- the first habitation of the place
- its political history, in chronological order
- its importance relative to other places or to the history of art and architecture
- for modern nations, include the languages spoken
- population may be included for inhabited places, provided you cite the date of your source

© J. Paul Getty Trust, Patricia Harpring 2009   Map from Encyclopedia Britannica online

SOURCES

- Required to list sources.
- For preferred name, prefer the most authoritative, up-to-date sources available. Sources of information in the TGN record may include the following in this order of preference:

❶ **Standard general reference sources**
- o atlases, loose maps, gazetteers
- o geographic dictionaries, encyclopedias, guidebooks
- o government Web sites, including NGA (NIMA) and USGS

❷ **Other official sources**
- o newsletters from ISO and United Nations
- o communication with embassies
- o Library of Congress subject headings

❸ **Other material on topics of geography or current events**
- o books, journal articles, and newspaper articles
- o archives and other original sources

❹ **Other sources**
- o inscriptions on art objects, coins, or other artifacts
- o catalog records of repositories of art objects
- o books on history of art and architecture

SCOPE OF AAT

- **Scope is from prehistory to the present**
- **No geographic limitations**
- Terms for concepts, activities, and objects discussed within the literature of the fields of art, architecture, decorative arts, archaeology, material culture, art conservation, archival materials, or related topics

- Must fit into the hierarchies already established in the AAT
- **Concepts identified by terms *excluding* proper names**
- thus it can be described as containing information about *generic concepts* (as opposed to proper nouns or names)

Patricia Harpring, 2009 © J. Paul Getty Trust

SCOPE OF AAT

Outside the scope of AAT:

• Geographic names (see TGN)

• Personal names (for artists, see ULAN)

• Corporate names

• Iconographic themes (see ICONCLASS)

• Titles of works of art or names of buildings (CONA)

• Brand names

Patricia Harpring, 2009 © J. Paul Getty Trust

REQUIRED FIELDS FOR AAT

- **preferred term**
- **variant terms: alternate descriptor (singular/plural)**
- **sources for the terms**
- **scope note**
- **source(s) for the scope note**

WHAT IS A TERM IN AAT?

- A word or phrase denoting a discrete concept in the context of a particular subject
  - Must be used consistently in multiple sources to always refer to exactly the same concept
  - It is not the same thing as a "heading," which may concatenate multiple "terms" together in a string
  - Terms may be combined to create headings where necessary for local use

WHAT IS A TERM

- AAT term represents a single concept
  - Gothic
  - cathedral
  - stained glass
  - rose windows
  - flying buttresses
  - naves
- Each of the above terms represents a concept applicable to this group of photographs
- *Gothic cathedral* is NOT a term. It comprises two terms.

Notre Dame, Paris, photos from www.GreatBuildings.com **© J. Paul Getty Trust; Patricia Harpring 2009**

EXAMPLES OF TERMS

rhyta	plural
rhyton	singular
color proofs	American English
colour proofs	British English
stilleven	other languages
gilding	synonyms that have various etymological roots
gilded	noun form
raking cornices	other forms of speech
cornices, raking	natural order
	inverted order

Patricia Harpring, 2009 © J. Paul Getty Trust

PREFERRED TERMS

- One term flagged "preferred"
- "Preferred" term is the term most commonly used in American English published sources
- Chosen from current scholarly literature and standard, general reference works
- Generally American English (including loan words)
- Please include **VARIANT TERMS** as well
- Include British English if needed; other languages, must have been transliterated into Roman alphabet in your source
- Each language has one <u>Descriptor</u>.

Patricia Harpring, 2009 © J. Paul Getty Trust

EQUIVALENCE RELATIONSHIP

column kraters
column krater
column craters
column-kraters
Corinthian craters
Corinthian kraters
kraters, column

- one term is required
- many records have multiple terms
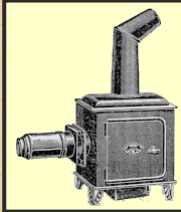

Patricia Harpring, 2009 © J. Paul Getty Trust

Black-Figure Column Krater. Painter of Munich 1736; ca. 520 BCE; terracotta; J. Paul Getty Museum, Villa, Malibu, California. Gift of Seymour Weintraub 75.AE.106

Terms in AAT

lantern slides *(preferred, descriptor)*
lantern slide *(alternate descriptor)*
lantern slide transparencies *(used for)*
magic lantern slides *(used for)*
slide, lantern *(used for)*
slides, lantern *(used for)*

- Multiple terms **must** refer to the same concept = true synonymity, NOT near synonymity
- One flagged as "preferred" for the record
- Prefer the term most commonly used in standard, authoritative, scholarly publications in American English
- Flag the descriptor(s)
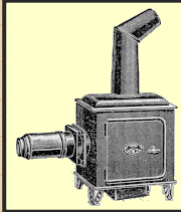

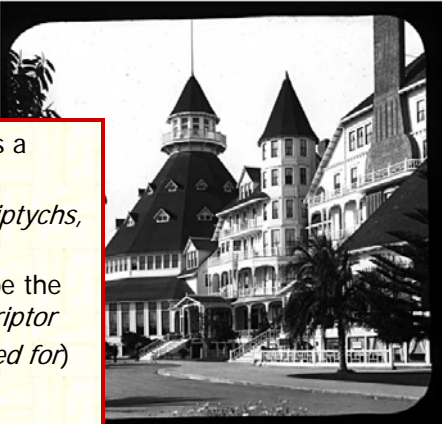

Hotel Coronado, San Diego. image from Magic Lantern Slides: The Berkeley Geography Collection; San Diego County. (monochrome) - NC-X-27

© J. Paul Getty Trust, Patricia Harpring 2009

Terms in AAT

lantern slides *(preferred, descriptor)*
lantern slide *(alternate descriptor)*
lantern slide transparencies *(used for)*
magic lantern slides *(used for)*
slide, lantern *(used for)*
slides, lantern *(used for)*

- NOUNS: For objects, preferred term is a plural noun, flagged *descriptor*
  - *statues, hôtels (town houses), triptychs, headdresses*
- For objects, the second term should be the singular noun, flagged *alternate descriptor*
- Synonyms may be added (flagged *used for*)
- Include inverted forms of descriptors
- Generally 2-3 terms, no more than 10

Hotel Coronado, San Diego. image from Magic Lantern Slides: The Berkeley Geography Collection; San Diego County. (monochrome) - NC-X-27

© J. Paul Getty Trust; Patricia Harpring 2009

COMPOUND TERMS

Do not make a compound term composed of a noun phrase containing an adjective that designates material, style, attribute, or technique. Doing so would mean that these adjectives would recur in infinite combinations throughout the AAT.

[examples of what are NOT allowed as compound terms]

Baroque + churches   stone + walls
Baroque + painting   stone + churches
Baroque + sculpture   stone + steps

lantern slides **comprises two words. Is it a 'term'?**

Patricia Harpring, 2009 © J. Paul Getty Trust

COMPOUND TERMS

- **Multiword or** *compound terms* **must be capable of being arranged in a genus-species relationship within the existing AAT hierarchies**
- **Each term must represent a single concept or unit of thought**
- **A compound term typically has a focus word and one or more modifiers**

[examples of valid single and multiword terms in the AAT]

domes	**stained glass**
watercolor	**High Gothic**
onion dome	**art historians**
flying buttresses	**Felis domesticus**

- **A quick test:** If either of the components of a compound term - when separate - expresses concepts that are different than when they are part of a compound term, bind them together in a compound term.
- If components of a compound term express the same meaning whether they are individual terms or part of a compound term, do NOT make a compound term.

Patricia Harpring, 2009 © J. Paul Getty Trust

Terms in AAT

embroidering *(preferred, descriptor)*
embroidered *(alternate descriptor)*
embroidery (**process**) *(used for)*

- PROCESSES: Preferred form noun or gerund for processes, techniques, and functions
  - **illumination, decoration, lacquering, sketching, embroidering, urbanization**
- Alternate descriptor is past participle for processes, techniques, functions, and activities
  - **scumbling ALT scumbled**
  - **cataloging ALT cataloged**

© J. Paul Getty Trust; Patricia Harpring 2009

Noh robe (Nuihaku), second half of the 18th century; Edo period (1615-1868) Gift of Mr. and Mrs. Paul T. Nomura, in memory of Mr. and Mrs. S. Morris Nomura, 1989 (1989,367)image from metmuseum online; Javanese woman embroidering, Britannica online

Terms in AAT

purpleheart *(preferred, descriptor)*
peltogyne (wood)
purpleheart wood
purplewood
violetwood
amaranth (purpleheart)

- MATERIALS: Preferred term for materials is singular

- Terms must have true synonymity
- *If the variant term is not of the same etymological origin, be especially careful*

Cabinet; Stamped by Joseph Baumhauer, about 1770; Oak veneered with ebony, tulipwood, amaranth and Japanese cedar; kijimaki-e lacquer panels; gilt bronze; yellow jasper top; J. Paul Getty Museum, 79.DA.58

© J. Paul Getty Trust; Patricia Harpring 2009

TERMS IN AAT

purpleheart *(preferred, descriptor)*
peltogyne (wood)
purpleheart wood
purplewood
violetwood
amaranth (purpleheart)

- Terms generally in lower case, except scientific terms, styles, other terms capitalized based on warrant
- Angevin Gothic, Brussels lace, Tudor roses

Cabinet; Stamped by Joseph Baumhauer, about 1770; Oak veneered with ebony, tulipwood, amaranth and Japanese cedar; kijimaki-e lacquer panels; gilt bronze; yellow jasper top; J. Paul Getty Museum, 79.DA.58

QUALIFIERS FOR HOMOGRAPHS

drums (column components)
> Cylinders of stone that form the shaft of a column.

drums (membranophones)
> Membranophones with a resonating cavity covered at one or both ends by a membrane which is sounded by striking, rubbing, or plucking.

drums (walls)
> The vertical walls, circular or polygonal in plan, that carries a dome.

- Homographs are spelled the same, disregarding capitalization and punctuation
- Include a qualifier if the term is a homograph for another term in the AAT
- Or if it is a homograph for another common term in standard language

© J. Paul Getty Trust; Patricia Harpring 2009

QUALIFIERS FOR HOMOGRAPHS

drums (column components) *(preferred, descriptor)*
drum (column component) *(alternate descriptor)*

Patricia Harpring, 2009 © J. Paul Getty Trust

- **Plural qualifier for plural nouns, singular qualifier for singular nouns**
- **Qualifier generally in English**
- Consult the Rules for devising a qualifier
- Use words from broader context, preferred term, or another distinguishing term when necessary, per Rules
- **Include qualifier for preferred or any other term in the record**
- In Editor Note, alert Vocab editors to add qualifier to existing term if necessary

TERMS IN AAT

violoncellos *(preferred, descriptor, American English-P)*

violoncello *(alternate descriptor)*

celli *(used for)*

cello *(used for)*

cellos *(used for)*

violoncelli *(descriptor, Italian-P)*

- Prefer term most commonly found in American English sources
  - **violoncellos vs. violoncelli**
  - **gymnasiums vs. gymnasia**
  - **akua'mma vs. akua'bas**
  - **Other language plural = variant term**

© *J. Paul Getty Trust; Patricia Harpring 2009*   Image: © David Hockney 1986; Pearblossom Highway, David Hockney, 1986, photographic collage of chromogenic prints, 78 x 111 in., J. Paul Getty Museum, 97.XM.39

LOAN WORDS

papier-m$03ach$00e *(preferred, descriptor, English-P, French-P)*

papier m$03ach$00e *(used for)*

paper-mache *(used for)*

papier mache *(used for)*

papier-m$03ach$00e = papier-mâché

- Terms borrowed from other languages that have become naturalized in American English
  - lits à la duchesse
  - mihrabs
  - pagodas
  - gongs
  - Schnitzaltars
  - Rathäuser
- May be both preferred English and preferred other language (French)

Lacquer comb and mirror case, 1878; Signed and dated: Fath Allah Shirazi, 1295 A.H.; Iran; Papier-mâché, painted, varnished, and gilded; L. at front 6 1/16 in. (15.4 cm), W. 3 1/2 in. (8.9 cm); Metropolitan Museum of Art, Gift of Irma B. Wilkinson, 1979 (1979.460.2ab); image from www.MetMuseum.org

Choosing the Parent

- Under the most logical broader term

- Under the most specific parent possible

- Be consistent with the precedent of other records in the same or similar sections of the hierarchies

- With the descriptor of the concept record in mind, determine if this concept is a *type of, kind of, example of,* or *manifestation of* the proposed parent concept

- Make sure that each subset of narrower terms clustered under a broader term is independent and mutually exclusive in meaning. Occasionally meanings may overlap among siblings, but avoid this when possible

Choosing the Parent

- **Hint:** To find the correct parent for your new term, look up a term in the AAT that you think is related to or similar to the term you want to add. See where that term is positioned, and then determine if your term will logically fit under that parent too, based on other terms under that parent and the Scope Note of the parent

- Be sure that the genus/species logic holds true upwards through all levels of the hierarchy above the concept

FACETS

- Facets are the top level of the AAT structure
- AAT is not organized by subject matter or discipline
- **"Hierarchies" are arranged within the seven facets**
- **Conceptually organized in a scheme that proceeds from abstract concepts to concrete, physical artifacts**

Associated Concepts	*Physical Attributes*	*Styles and Periods*	*Agents*	*Activities*	*Materials*	*Objects*

Information Forms Hierarchy
```

SCOPE NOTE

For Art Nouveau

Note: Refers generally to the style of painting, architecture, and the decorative and applied arts that flourished in Europe and the United States from about 1890 to 1910. The style is characterized by an emphasis on fluid, undulating, or serpentine lines or contours based on organic forms and the use of modern materials such as iron and glass.

Topics may include the following:

- the usage of the descriptor, alternate descriptors, and used for terms in the record
- the meaning and context of the descriptor and other terms in the record
- distinguishing between terms that are in different records and have overlapping meanings or that may otherwise be confused by users

© J. Paul Getty Trust; Patricia Harpring 2009

SOURCES FOR THE AAT RECORD

Sources of information in the AAT record may include the following:

❶ Standard general reference sources

- major authoritative dictionaries of the English language, including Webster's, Random House, American Heritage, and the Oxford English Dictionary (for the OED, be aware that words may be spelled differently in American English)
- encyclopedia
- dictionaries in languages other than English
- LC term Authority Headings

❷ Other authoritative sources

- other authoritative thesauri and controlled vocabularies
- textbooks, such as Gardner and Janson

❸ Other material on pertinent topics

- books, journal articles, and newspaper articles
- archives, historical documents, and other original sources (for historical terms only)

❹ Other sources

- databases of contributors
- articles or databases on museum or university Web sites

Creating the Vocabularies

- The Getty vocabularies are compiled in large part from contributions from the user community, including various Getty projects and qualified outside institutions
  - Thanks to our contribution program, in essence we have many "adjunct Vocabulary Program Editors," with expertise in a variety of areas

- Institutions may make contributions via an online form
- One term at a time
- Important for institutions with only a small number of contributions

PDF version for printing

3   EDITORIAL RULES, CONTINUED

3.3.2.5.1   **Minimum requirements**
It is required to record at least one term - the *preferred term*, which is the word or phrase used most often in scholarly literature to refer to the concept. Excluded are proper names of persons, organizations, geographic places, named subjects, and named events.

- **Warrant**: You must find the preferred term in at least three authoritative sources. See **Sources for Terms** below.

- List as many variant or alternate terms as have at least one legitimate source. It is not required to add variant terms, however, you should consult sources to gather alternate terms as time and editorial priorities allow.

3.3.2.5.2   **Alphabet and diacritics**

   » *Roman alphabet*

   Use the Roman alphabet to record all terms

- **Transliterations**
  For terms in a language that is not written in the Roman alphabet (e.g., Greek or Chinese), record the vernacular term that has been transliterated into the Roman alphabet. **For the preferred term**, you should ideally use a source that has a transliteration derived by applying pertinent ISO standards.

- **Diacritics**
  Do not include diacritics or special characters in the term field. Indicate

(most recent entries are at the top of each section)*

General News for AAT, TGN, and ULAN

- **Vocabulary Program reorganization**

In the ongoing reorganization at the Getty Research Institute, the Vocabulary Program is now under the Collection Management and Description Division (David Farneth, Head). Other GRI departments in this division are General Collection Cataloging, Special Collections Cataloging, Digital Services, the Registrar's Office, Institutional Records and Archives, and Conservation and Preservation. The Vocabulary Program will also work with Art History Documentation (Murtha Baca, Head) to foster foreign-language translations of the vocabularies, maintain national and international partnerships, and oversee licensing and marketing. Vocabulary Program staff include Patricia Harpring (Managing Editor), Antonio Beecroft (Editor), Robin Johnson (Editor), and Jon Ward (Editor). Ming Chen, formerly an editor, is in the process of transferring to another department at the Getty.

- **Contributions:** Contributions via our online contribution form continue every month. Bigger contributions are loaded in bulk. We seek the continued support of the user community in acquiring contributions. Read about contributions at http://www.getty.edu/research/conducting_research/vocabularies/contribute.html. **If your institution would like to contribute, please write to vocab@getty.edu.**

- **Online data:** Note that the Web data in the "browsers" continues to be updated monthly, on or near the first of each month. Usage averages around 180,000 queries per month.

- **Annual releases:** The 2009 releases of data files for AAT, ULAN, and TGN are now

---

- The systems in place to allow this work were built and are maintained by a dedicated group from the Getty Information Technology Services (ITS)
- Worked on user requirements and testing in close cooperation with the Vocabulary Program

Patricia Harpring © 2009 J. Paul Getty Trust

- Editorial system has been built (VCS), Import and Export formats designed
- Basic editorial module is completed
- Ongoing
  - Loading and vetting of contributions, publishing, CONA
  - Goal: terms contributed easily, automatically, part of regular work flow at the Getty

Technical solutions

- **The Getty Vocabulary Program, together Getty Information Technology Services (ITS), is developing a set of Web services APIs (application programming interfaces) to enable access to the most up-to-date version of the Getty vocabulary data in real time.**

- **The APIs are in Beta testing during 2009.**

- Small staff
- Process contributions
- Reliance on user community

Patricia Harpring

Usage Statistics: Third Quarter FY09	
Total number of unique users:	125,876
Total number of unique "visits":	162,104

Production Statistics: Third Quarter FY09	
Records edited or added:	18,401

Antonio Beecroft

Robin Johnson

Jonathan Ward

© J. Paul Getty Trust; Patricia Harpring 2009

- Four editors work full-time on processing contributions
- Currently have over 120,000 records in processing phase
- Will be over 5,000,000 at end of the year

Vocab Editing Quotas

Task	Records per day
Creation of difficult new records	10
Extensive Scope/Descriptive Notes, filling in existing records	10-15
Moderate filling in of records	20-25
Straightforward data cleanup	70-80
Moderately detailed data cleanup	35-45
Merging and moving candidates into publishable hierarchy	90-100

- Priority is to process online contributions
- Set priorities for bulk loaded records (e.g., Avery)
- Editors have quotas, but greatest number possible is 10 to 100 records per week, depending upon the amount of research required for the particular task
- Every year spend 2 months preparing data for the annual licensed files release

Vocab Editing Quotas

Task	Records per day
Creation of difficult new records	10
Extensive Scope/Descriptive Notes, filling in existing records	10-15
Moderate filling in of records	20-25
Straightforward data cleanup	70-80
Moderately detailed data cleanup	35-45
Merging and moving candidates into publishable hierarchy	90-100

Multilingual AAT terms:
- We have received a complete translation of the AAT in Spanish from Centro de Documentación de Bienes Patrimoniales, Chile. The data will be loaded and integrated beginning in August or September 2009.
- A Chinese translation is underway by the National Digital Archives Program, Taiwan.
- A German translation is being undertaken by the Institut für Museumsforschung in Berlin.
- The Rijksbureau voor Kunsthistorische Documentatie is scheduled to deliver a full Dutch translation of the AAT later in 2009. They are also hoping to begin contributing new terms to the AAT this year.
- We are in the process of integrating around 3,000 Italian object type terms from ICCD, Rome, which were contributed several years ago.
- The full set of 3,000 French terms from CHIN has been fully integrated.

Quality Control

Automatic construction of vocab? No.

- users require exact synonyms and relationships, close is not good enough

- much merging and constructing hierarchies is done by hand, in order to ensure accuracy and correct placement within the logic of the thesaurus

- some automatic merging of exact matches is possible based on strict criteria

Patricia Harpring, 2009 © J. Paul Getty Trust

Patricia Harpring, 2009 © J. Paul Getty Trust

Sources of the Vocabularies

- Vocabulary Program: Getty vocabulary editors edit and add new terminology

- Sources include standard general published sources, text books, scholarly articles, museum records, etc.

- **Thesaurus tool may be used with cataloging systems**

Getty Vocabularies are sets of standard terminology that typically form a critical part of an institution's local vocabulary

- A combination of vocabularies will be necessary
  - Required terms may be outside the scope of a given vocabulary
  - No single vocabulary is comprehensive for its scope
- Local authorities should be populated with published vocabularies and local terminology

© J. Paul Getty Trust; Patricia Harpring 2009

Why do we need local authorities?

- Local authorities provide terms not found in published authorities (e.g. unpublished terms, non-expert terms, "wrong" terms, local terms)
- Local authorities remind cataloguers of policies regarding local usage of terms.
- Local authorities cluster together all the variant names for terms, and identify the terms that are preferred and used by the particular institution.
- Local authorities can provide non-expert, "non-scientific" or simply collection-specific broader terms to assist end-users

© J. Paul Getty Trust; Patricia Harpring 2009

Controlling data values?

Authorities as described in CDWA and CCO

- Some use controlled lists, some controlled formats (e.g., dates)

- But values in many fields are best controlled by authorities

Cataloguing Cultural Objects: A Guide to Describing Cultural Works and Their Images — Draft

- **What is an Authority?**

- ***Authority record:*** Controlled vocabulary implemented for the purpose of controlling terminology in catalog records. Includes one or more names or headings (typically one is "preferred"), cross references, notes, and other information about a person, place, or thing.

- ***Authority file:*** A collection of authority records.

•*Note*: One of the primary deities of Hinduism. He is the paramount lord of the Shaivite sects of India. Shiva means "Auspicious One" in Sanskrit. He is one of the most complex gods of India, embodying contradictory qualities: both the destroyer and the restorer, the great ascetic and the symbol of sensuality, the benevolent herdsman of souls and the wrathful avenger. He is usually depicted as a graceful male. In painting, he is typically white or ash-colored with a blue neck, hair represented as coil of matted locks, adorned with the crescent moon and the Ganges. He may have three eyes and a garland of skulls. He may have two or four arms and

Joachim Wtewael, Mars and Venus, 1606 - 1610

Since antiquity, stories of the ancient gods and goddesses, such as Zeus, Aphrodite, and her son Eros, continued to be depicted, even while they had lost their religious significance. In the Renaissance, a classical education was required of all learned gentlemen; knowledge of Greece and Rome demonstrated one's learning, taste, and status. A

Venus

Mazarin Venus, 100-200 A.D.

Aphrodite, the Greek goddess of love, was known to the Romans as Venus. The most popular deity in art, she was portrayed frequently by the ancients and was a favorite from the Renaissance onward. Different traditions surround her birth: in one version, she was the daughter of Zeus; in another, she was created when the severed genitals of Uranus fell into the sea. Representing one of the prime motivating forces in

Applying vocabularies

- There is no prescribed method of using the vocabularies
- Must make local decision
- Factors to consider
  - specificity
  - exhaustivity
  - pre- vs. post-coordination

Pre-coordination: Combination of individual concepts into compound or complex terms at the point of data storage

Post-coordination: Combination of individual concepts into compound or complex terms at the point of retrieval
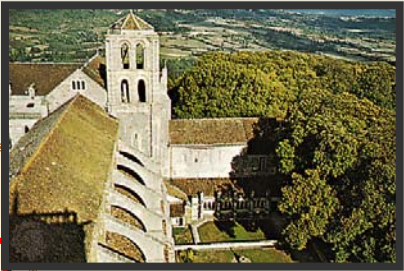

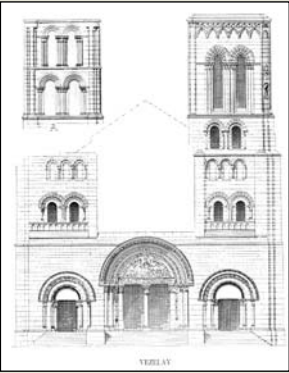

- Which will your local system or authorities allow?
- What is your local methodology?

Separate fields allow retrieval of basilicas that have style Romanesque

- *Title:* La Madeleine
- *Work Types:* ▪ **basilica** ▪ **church**
- *Styles:* ▪ **Romanesque** ▪ **Gothic**
- *Creation Date*: original church was rebuilt after fire of 1120, choir was rebuilt after 1200
- *Current Location:* Vézelay (Burgundy, France)

- Vocabulary separates unique concepts to make it more powerful and more versatile
- "Romanesque basilica" is a compound concept

Romanesque basilica
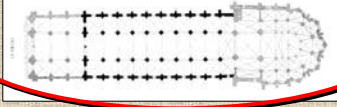

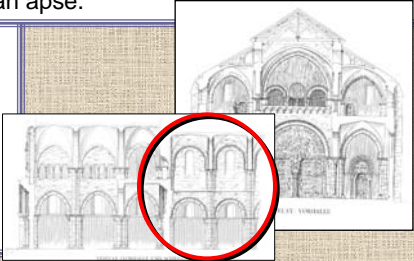

- Concepts are separate in the AAT
- "basilica" is the form of the building
- "Romanesque" is the style and period

Single Built Works
  <single built works by form>
    basilica
Refers to religious or secular buildings characterized by an oblong plan divided into a nave with two or more side aisles, the former higher and wider than the latter and lit by clerestory windows, usually terminated by an apse.

Styles and Periods
  Medieval
    Romanesque
Refers to the style and period most evident during the 11th and 12th centuries in western Europe. The style ... in general is characterized by the interpretation of ancient Roman style, including great size, round arches, ...

Concept Authority

Material: red silk

- Compound terms may be constructed in the work record

- Advantage of
- "pre-coordination" is that the terms stay together
- E.g., if you have a red silk and black wool vestment, indexing should bind "red" and "silk" together

© J. Paul Getty Trust; Patricia Harpring 2009

Search: red AND silk

Title: Opus Anglicanum, Chasuble
Creator: unknown English
Creation Date: 1330–1350

Materials:
    silk
    red
    wool
    black
    metallic
    thread
    velvet
    embroidering

Location: **Metropolitan Museum of Art, New York**

- Cannot distinguish between red silk and black wool because the color is not joined to the fiber
- However, this may be adequate for local retrieval needs

Indexing

Specificity and Exhaustivity

Specificity

- How precise are your indexing terms?
  - "temples" or "wats"
  - "photographs" or "daguerreotypes"
- Collection size
- Collection focus
- Expertise of cataloguers
- Expertise of users

> ▪ A minimum record should contain values
>   in all of these elements
> ▪ How many terms you use in each element
> ▪ and whether or not you include additional
>   elements are local decisions =
>   Exhaustivity
> ▪ How specific your terms are is a separate
>   issue = Specificity

Hierarchy

<paint by composition or origin>

    water-base paint

       tempera

          casein paint

          egg-oil tempera

          egg tempera

          gum tempera

          oil tempera

- **There are various types of tempera**

- **Perhaps "egg tempera" more accurately describes the medium**
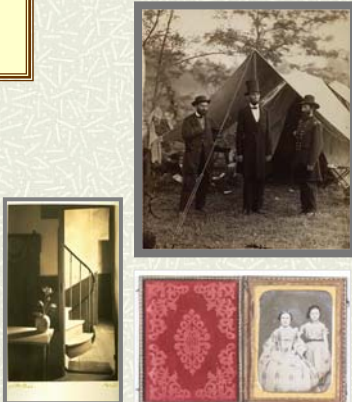

Scope Note for **egg tempera:**
Tempera paint using egg as its vehicle, traditionally the yolk only, in other cases, the whole egg.

...............pschents
...............tiaras

Exhaustivity

- How many aspects of a work do you catalog? How many terms do you assign to a work?
- Time limitations
- Focus of the collection

Consider how to apply vocabularies to various catalog levels

- *Extent of indexing may be governed by internal factors*
- *Priority may be to gain initial control of material*
- *Project may be indexed in phases*

Phase 1 = group   Phase 2 = box   Phase 3 = item
# How to apply vocabularies to various catalog levels

- Extent of indexing may be governed by internal factors
- Priority may be to gain initial control of material
- Project may be indexed in phases
- Set goals and quotas, quality control

Phase 1 = group   Phase 2 = box   Phase 3 = item

Veduta di Piazza Navona sopra le rovine del Circo Agonale.
Giovanni Battista Piranesi. Etching. 1746/1748.

Indexing a group of objects

Record Type: group
Work Types:
preliminary drawings
presentation drawings
working drawings
sections
elevations
plans
Title: Group: Drawings for Falling Water (Kaufman House), Bear Run, Pennsylvania
Creator: Frank Lloyd Wright
[link]: Wright, Frank Lloyd Role: Architect
Creation Date: 1936-1937

Description: Wright designed the house for Pittsburgh department store

- Should vocabulary reflect all items in the group at a specific level?
- Or broad indexing, with specific terms linked to items?

  - *Aalst (inhabited place)[N*
  - *Antwerp (inhabited place*
  - *Bruges (inhabited place)*
  - *Brussels (inhabited place*
  - *Gent (inhabited place)[N*
  - *Leuven (inhabited place)*

Slide 2

- Index historical name? Or modern counterpart?
- e.g., Flanders or Belgium?

- If the historical entity is not the same place, concept, person, etc. as the modern counterpart
- Then the two names/terms should be in separate authority records
- Thus you should link to the correct historical entity
- E.g., historical Flanders did not have the same boundaries as modern Belgium; they are NOT equivalents in a thesaurus

World

Europe (continent)
- **Bulgaria (nation)**
- **Belarus (nation)**
- **Belgium (nation)**
- **Czech Republic (nation)**

Use historical names ?

Class: sculpture
Work Type: sculpture, votive figures
Title : Ploughman of Arretium
Measurements: 7 1/4 in. length
Material: bronze
Creator: unknown Etruscan
   [link] unknown Etruscan *Role:* sculptor
Creation Date: 6th century BCE
Creation Location: Arretium
Style: Etruscan
Subject: ploughman, oxen, labor, afterlife, ceremonies
Description: This figure was found in one of the many sanctuaries from Etruscan Arretium, and was probably a votive offering. The subject reflects a natural preoccupation of the inhabitants of Arretium, which was an outpost of Chiusi in a fertile farming region.
Current Location: Archaeological Museum (Florence, Italy)

© *J. Paul Getty Trust; Patricia Harpring 2009*

- In this case, ancient and modern towns are equivalents
- Your system may not allow you cannot to link to the ancient town name, but only to the record as a whole
- If so, you can index with the modern name and refer to the ancient name in a note

Location Authority
Arezzo *(preferred, Italian-Pref)*
Arretium *(historical, Ancient Latin)*

Archaeological Museum, Florence, Italy. Image from http://www.mega.it/archeo.toscana.

Implementing Vocabularies for Retrieval

Using other semantic relationships in retrieval

- **retrieval using defined relationships between vocabulary terms and other data**
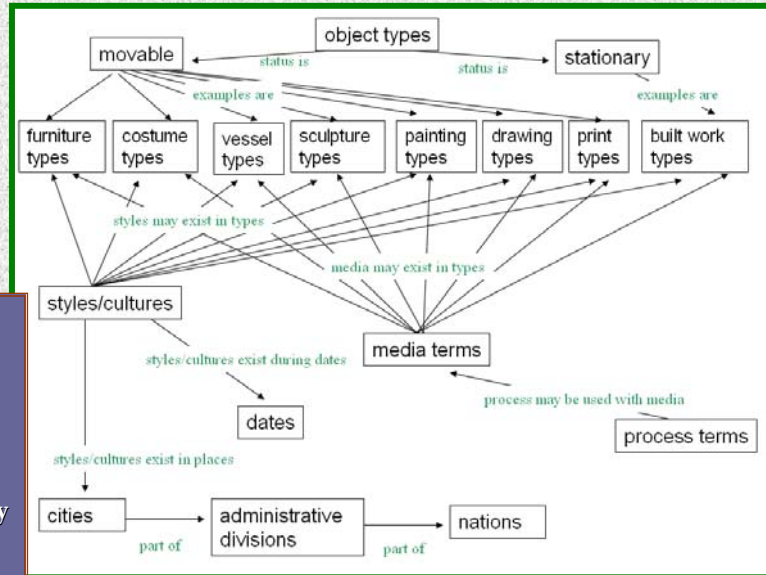

© J. Paul Getty Trust; Patricia Harpring 2009

Interoperability

- Interoperability in the context of controlled vocabularies refers to the ability of two or more vocabularies and their systems or components of their systems to exchange and use each other's information.
- Used in retrieval and also by indexers who need multiple, but related, vocabularies
- Mapping terms from two vocabularies is challenging
  - meaning of terms, structure, context, synonymity, authoritativeness, pre- and post-coordination, and other issues must be resolved
- Some mapping may be done by data mining and algorithms, but human mediation is also necessary for success

How to Display Vocabulary Information

How to disambiguate homographs

1. ☐ 🔗 **Pajou, Augustin**
   (French sculptor and draftsman, 1730-1809) [500015509]
   Augustin Pajou
   Augustin Pajou le Père

2. ☐ 🔗 **Pajou, Augustin Desire**
   (French artist, 1800-1878) [500056917]
   Augustin Desier Pajou

3. ☐ 🔗 **Pajou, Jacques Augustin**
   (French painter, 1766-1828) [500028425]
   Jacques Augustin Pajou
   Pajou, Jacques Augustin Catherine

National Gallery of Art, Washington, DC
Samuel H. Kress Collection 1952.5.107; image from http://www.nga.gov

- *In ULAN, use preferred name with preferred biography*
- *Show all names that meet criteria of the search*
- *Given that the sculpture dates from 1760, user knows that the artist must be Pajou père*

© J. Paul Getty Trust; Patricia Harpring 2009

How to disambiguate homographs

1. Alexandria d Palea
   Alexandria Stalicellorum
   Alexandria Statiellorum

2. ☐ 🔗 Alexandria .... (inhabited place)
   (World, Africa, Egypt, Urban, Al-Iskandarīyah governorate) [7001188]
   Vernacular: Al-Iskandarīyah
   Alexandria Ad Aegyptum
   Alexandria Aegypti

3. ☐ 🔗 Alexandria .... (inhabited place)
   (World, Africa, South Africa, Eastern Cape, Province of) [1092814]

4. ☐ 🔗 Alexandria .... (deserted settlement)
   (World, Asia, Pakistan, Baluchistān) [6000172]

5. ☐ 🔗 Alexandria .... (inhabited place)
   (World, Europe, Romania, Teleorman) [1050005]

6. ☐ 🔗 Alexa...
   (Worl...

7. ☐ 🔗 Alexa...

- *In TGN, use the parent string and place type*
- *Here parents display in descending order to allow intelligent sorting on parent string*
- *May display in ascending order for more natural display in other contexts*

© J. Paul Getty Trust; Patricia Harpring 2009

How to disambiguate homographs

Alexandria *(Asia, Pakistan, Baluchistan)......(*deserted settlement)

Alexandria *(Baluchistan, Pakistan)* (deserted settlement)

- *Parent string in reverse order allows indexing by continent, nation*
- *In natural order is easier to read*

image from Encyclopedia Britannica OnLine. Alexander the Great as Zeus Ammon on a silver tetradrachm of Lysimachus, 297-281 BC; thought to be a copy of a portrait by Lysippus. In the British Museum.

© J. Paul Getty Trust; Patricia Harpring 2009

Accommodate requirements of horizontal vs. hierarchical displays. E.g., "display name" for parent string

- special name flagged for horizontal displays
- where simple name is confusing
- in a heading

Names:
    Coast (preferred, C,V,N)
    Coast Province (display, C,V,N)

Galana (*Coast Province*, Kenya, Africa) river

© J. Paul Getty Trust; Patricia Harpring 2009   http://encarta.msn.com/

Hierarchical display for thesauri

- Top of the TGN hierarchy (hierarchy root)
- .... World (facet)
- .... Asia (continent)
- .... India (nation)
- .... Delhi (union territory)
- .... Delhi metropolitan area (metropolitan area)
- .... Delhi (inhabited place)
- .... Qutb Minar (tower)
- .... Red Fort (fort)

- Preferred display of hierarchies is with indentation for general audience
- Use graphics to indicate focus and where levels may be expanded

© J. Paul Getty Trust; Patricia Harpring 2009

Image: AP photo in BBC online

Other displays for thesauri

BRITISH MUSEUM *MATERIALS THESAURUS*

A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z [Introduction]

ABACA FIBRE

    RT PALM FIBRE ➡
    BT FIBRE ➡

ABALONE SHELL

    BT HALIOTIS SHELL ➡

ABODIE BARK NP

    PT CAMWOOD BARK ➡

- Flat hierarchical view is hard for non-expert to interpret ("RT", "BT", "PT", etc.)
- Flat view does not work well with a large thesaurus

How to Retrieve by Name / Term

© J. Paul Getty Trust; Patricia Harpring 2009

How to search by name / term?

- *full name string, exact*
- *full name string, normalized*
- *truncation*
- *key words*
- *Boolean operators*

© J. Paul Getty Trust

Access by all equivalent names/terms

- *Basic access by all terms/names is critical*

Descriptor: **sepia**

Synonyms, spelling variants:

cuttlefish ink
ink, cuttlefish

Perseus and the Origin of Coral, ca. 1671. Claude Lorrain (French, 1600 - 1682); black chalk, sepia and black ink, sepia and gray wash heightened with white; 10 x 12 13/16 in. (25.4 x 32.5 cm). Metropolitan Museum of Art (New York, New York, USA). Robert Lehman Collection, 1975. (1975.1.661)

- Tools such as Soundex and other phonetic algorithms do not work well with names and most AAT terms, because all languages (not only one language may be represented in the vocabularies

- Therefore, specialized normalization and searching algorithms are advised for vocabularies

Soundex: a phonetic algorithm for indexing names by sound based on English pronunciation. Names with the same pronunciation are encoded to the same representation so that they can be matched despite minor differences in spelling.

© J. Paul Getty Trust; Patricia Harpring 2009

How results can differ

FULL NAME STRING
EXAMPLES
Florenz
Rancho San Diego
River Thames
ISSUES
✪Can yield accurate retrieval, *important for large data sets & for finding errors*
✪Queries fail due to no exact match *(e.g., Thames or Thames, River)*
✪Query on normalized name increases hits *(e.g., Rancho Sandiego);* remove case, spaces, punctuation, diacritics

KEY WORDS
EXAMPLES
Thames
Diego
Sena
 ISSUES
✪Allows retrieval when exact format of multiple word names is unknown *(e.g., Thames, or River Thames, or Thames, River)*
✪Causes problems for compound words if full name query is not also an option *(e.g., Rancho Sandiego vs. San Diego, Rancho)*
✪Most effective with Boolean operators an option, *otherwise results list may be too long*

© J. Paul Getty Trust; Patricia Harpring 2009

How results can differ

TRUNCATION

EXAMPLES
Edinburg*
Pyeitawinzu Myanm* Nain*
***angqiao**

ISSUES
✪Wild card allows retrieval when exact spelling is unknown
✪Left-hand truncation is very helpful, *but impractical with large data sets*
✪Wild card may be applied to full name string and to key words

BOOLEAN OPERATORS

EXAMPLE: full name
Bay of Biscay OR Biscay, Bay of
EXAMPLES: key words
(Castillo OR Rancho) AND Diego Monte AND Oliv*

ISSUES
✪Allows best retrieval, *most control by user*
✪May be applied to full name string and to key words
✪Naïve user may not understand logic of formula *(AND & OR, parantheses)*
✪Place name may be homograph of operator, *e.g. "Or"*

© J. Paul Getty Trust; Patricia Harpring 2009

How results can differ

STOP LIST

EXAMPLES
West
Lake
al

ISSUES
✪Not the same as general database *(e.g., not articles & prepositions)*
✪Should be allowed with Boolean operators, *or results will be too limited*
✪Need way to allow queries on names composed only of stop words *(e.g., town called "Lake")*

ABBREVIATIONS

EXAMPLES
St. Louis
**W Lafayette**
Mt Everest
Moskovskaya Ob

ISSUES
✪Map to full word allows best retrieval, *but difficult for vernaculars*
✪Often affects place types in names, directional indicators

© J. Paul Getty Trust; Patricia Harpring 2009

- *Allow post-coordination in retrieval*
- *E.g., Romanesque AND basilica*

- Ideally, retrieval tool looks first for exact match on term
- Then looks for either of the "key words"

- *Built Work Name:* La Madeleine
- *Location:* Vézelay (Burgundy, France)
- *Built Work Type:* basilica, church
- *Style:* Romanesque, Gothic
- *Date of Execution*: original church was rebuilt after fire of 1120, choir was rebuilt after 1200

VEZELAY

© J. Paul Getty Trust; Patricia Harpring 2009

- For multiple-word terms, should find the exact match
- Does not search for individual words alone

compound pier

image is from http://vrlab.fa.pitt.edu/medart/menufrance/vezelay/vezintro.html

© J. Paul Getty Trust; Patricia Harpring 2009

Automatic truncati...

- *If no exact match is found, tool automatically truncates words and tries to find a match (to overcome lost matches due to plurals)*
- *e.g., "dome* AND "turkish*"*

St. Basil's Cathedral, Moscow; image from http://www.ucmp.berkeley.edu/pub/journal
Find Name: **dome, turkish**
Logic:
Note:

[View Selected Records]   [Select All Records]   [Clear All]

Click the ⵚ icon to view the hierarchy.
Check boxes to view multiple records at once.

1.   ☐ ⵚ   **onion domes**
     (dom[e]s (dome components), <domes and d...
     domes, Turkish

© J. Paul Getty Trust; Patricia Harpring 2009

Key Words and Boolean

- Names in natural or inverted order (pivot using the comma)
- Retrieval by keywords or normalized strings
- Automatic "anding" or "oring" not successful because it brings back too many results

1.   ☐ ⵚ   Ghunayjah, Jabal al .... (mountain)
     (World, Africa, Egypt, Desert, Shamāl Sīnā') [7024974]

Possible queries from users:
Ghunayjah, Jabal al-
Ghunayjah
Jabal AND Ghunayjah
Jabal Alghunayjah

"Keyword" table created for matching:
      ghunayjah
      jabal
      al
      ghunayjahjabalal
      jabalalghunayjah

© J. Paul Getty Trust; Patricia Harpring 2009

Normalizing diacritics

- Accommodating diacritics
- in query
- in data (Unicode, other codes)
- if display of non-Latin 1 not possible

Possible queries from users:
Amazônica
Amazónica
amazonica

Oriente .... (region)
(World, South America, Ecuador) [7024091]
Región Amazónica
Ecuador Amazónico
Grande Região Norte .... (region)
(World, South America, Brazil) [7023444]
Amazônica Brasileira
Variant Amazônica, Região
Amazon Basin ....(basin)
(World, South America) [7024123]
Hoya Amazónica
Bacia Amazônica

"Keyword" table is normalized, omitting diacritics:
amazonica
amazonica
