Central Coast Regional Water Board

Upcoming Priorities:

- Improve urban stormwater runoff's quality and quantity, and increase watershed sustainability through the development and approval of high-quality Stormwater Management Plans for 41 municipalities.
- Improve irrigated agricultural runoff and percolating water quality through the adoption of a more targeted and effective irrigated agriculture order in July 2010, and by improving practices through the Central Coast Irrigation and Nutrient Management Grant.

The Central Coast Region extends from Santa Clara County south to northern Ventura County. The region has 378 miles of coastline, including Santa Cruz and the Monterey Peninsula, the agricultural Salinas and Santa Maria Valleys, and the Santa Barbara coastal plain. Tourism, power and oil production, agriculture and related food processing activities are the major industries.
