Details

- Client size: Mid-sized company.
- Country: South Africa.
- Licenses: 122.
- Product: Panda Security for Business with Exchange.

"I can now control Panda from one console, it makes things a lot simpler".

Jacques van der Merwe
IT Manager
Universal Footwear & Trading Company

Benefits

- **Unified centralized console:** All the protection modules are managed from a single point.
- **The most advanced proactive technology:** The most highly recognized technology which includes intrusion prevention, proactive detection and behavior scanning.
- **In-depth malware audits:** Malware Radar detects and disinfects hidden threats.
- **Control of network access:** It prevents infected, dubious or dangerous computers from connecting to the network and infecting information and files.
- **Anti-spam protection for workstations and Exchange servers:** Based on online queries, it detects and blocks spam in any language.

Universal Footwear & Trading Company is completely protected thanks to Panda Security for Business with Exchange.

Universal Footwear & Trading Company (Zoom) has chosen Panda Security for Business with Exchange to protect its Exchange server and 122 office computers.

Its simple management through the AdminSecure console which allows users to manage the protection modules from a single point and its continuous periodic updates were the main reasons behind the management of Universal Footwear & Trading Company choosing Panda Security for Business with Exchange instead of other solutions.

They also note that other reasons for choosing Panda included its low cost, the local support and its centralized management with AdminSecure.

"I like Panda, I used to use Trend, but where Trend was very fragmented I can now control Panda from one console, it makes things a lot simpler since I'm the only IT guy at Universal Footwear; also, it was a lot cheaper," claims Jacques van der Merwe, IT Manager of Universal Footwear.

Jacques van der Merwe also explains that they have never had a problem with Panda Security for Business with Exchange once installed, and says its maintenance is very easy.

"The only installation problem occurred when we rolled out to the servers and our Domain Controllers locked up the whole network, but that was a problem with our network configuration and once we upgraded our software everything worked fine with Panda," assures the IT Manager.

About Universal Footwear & Trading Company.

Universal Footwear & Trading Company (Pty) Ltd was established in 1993 by Philippe and Sheri Hasson. Today the company imports/exports as well as having a chain of "ZOOM" retail stores across South Africa and in Australia.

Universal Footwear & Trading Company (Pty) Ltd has evolved into a product development, sourcing & distribution wholesaler to all major chain stores across South Africa, Australia, New Zealand, and the USA, mostly under house brands. They also manufacture products under licence which include Disney Barbie, Bratz, Batman, Spiderman etc. These products range from footwear, accessories, hats and jewelry.

The company's own brands, namely ZOOM – Ladies, ZOOM – Men, Daniella Michelle, Tina Liu, and Whistles, as well as their independent customers and retail division, are a separate focus. The ZOOM retail stores enable the company to showcase all their brands under one roof.

ZOOM has become one of the most successful retail brands in South Africa.
